FARMER'S WIFE TOO ILL TO WORK

A Weak, Nervous Sufferer Restored to Health by Lydia E. Pinkham's Vegetable Compound.

Kasota, Minn. - "I am glad to say that Lydia E. Pinkham's Vegetable

more for me than anything else, and I had the best physician here. I was so weak and nervous that I could not do my work and suffered with pains low down in my right side for a year or more. I took Lydia E. Pinkham's Vege-

Compound has done

table Compound, and now I feel like a different person. I believe there is nothing like Lydia E. Pinkham's Vegetable Compound for weak women and young girls, and I would be glad if I could influence anyone to try the medicine, for I know it will do all and much more than it is claimed to do." - Mrs. CLARA FRANKS, R. F. D. No. 1, Maplecrest Farm, Kasota, Minn.

Women who suffer from those distressing ills peculiar to their sex should be convinced of the ability of Lydia E. Pinkham's Vegetable Compound to restore their health by the many genuine and truthful testimonials we are constantly publishing in the newspapers.

If you have the slightest doubt that Lydia E. Pinkham's Vegeta-ble Compound will help you, write to Lydia E. Pinkham Medicine Co. (confidential) Lynn, Mass., for advice. Your letter will be opened, read and answered by a woman, and held in strict confidence.

Empty Titles. The emperor of Austria, it has been noted, lays claim to the title marquis of Antwerp. If all European sovereigns could make good their minor territorial titles there would, indeed, be a reconstruction of the map. The king of Italy, for instance, is officially styled king of Sardinia, France, Spain and England, of Italy and Jerusalem, of Greece and Alexandria, of Hamburg and Sicily, Master of the Deep, King of the Earth. The king of Spain also claims to be king of Jerusalem, king of Galicia (a title shared with the emperor of Austria), and, in addition, king of Gibraltar, of the West Indies and of India.

The barrels are shaken lightly, in order to insure their being full. A good heading device is imperative where a large crop is to be handled

Apples to be held for shipment or stored for home use, should be kept in a temperature ranging between 32 to 40 degrees-neither higher or lower.

COMBATING INSECT PESTS IN ORCHARD

cayed Fruit, Dead Leaves, Limbs and Trees.

The orchard should be thoroughly cleared of all refuse such as decayed fruit, dead leaves, limbs and trees, just after harvesting the fruit. There is only one way to produce good fruit and that is to keep the orchard in a healthy condition and as free as possible of the many ravenous pests, that would, if not held in check, quickly destroy it.

Where rubbish is allowed to remain in an orchard, especially through the winter season, it makes a good harbor for insects; but if removed and burned will destroy a large portion of food, and de holding the frost in the

Every sucker, dead limb and tree should be removed from the orchard over. After the weather becomes setas well as all refuse under the trees tied, the coarse part of the mulch for upon these useless branches and should be raked off and removed, leavtrees and under the rubbish winter the ing the fine part to contribute its enemies which next spring will lay richness to the soil. the eggs which will produce thousands of pests.

trees to stand year after year in their orchards to decay while others will simply cut the trees down and pile them until the insect life which they guard against injury to the leaves. contain has developed into myriads living trees.

and the roots left in the ground. They must be taken out roots and all for the roots contain insects which if not removed will pass to the roots of other

Two of the most destructive insects we have to trees are the root borer and the bark beetle. They are both again two weeks later. If this is easily detected. The root-borer can be found near the surface boring its way into the roots while the presence of the bark-beetle is noticeable by the limbs and body of the trees containing ing into sheet spread for the purpose, small holes as though a charge of buckshot had been fired into them. If It goes up from the ground to its work. these enemies are allowed to run their course the result will be the death this: It cuts a tiny flap out of the of the trees.

The birds are our best friends and the very best means of destroying all insect pests and should be encouraged | for it. to live and nest in the orchards. There is scarcely a bird that is not worth more than its weight in gold because of the many insects it destroys.

GOOD TREATMENT NEEDED BY PLUMS

Remove All Refuse, Such as De- Dropping of Fruit Before Maturity May Be Prevented by Giving Proper Attention.

> (By BESSIE L. PUTNAM.) There is a common complaint among those who have plum trees, that the plums always drop before maturity. This can be easily prevented by proper treatment. It is usually due to lack of nourishment, late frost, or the curculio-most frequently to the latter, though often the two enter as damaging factors.

> In early spring while the ground is still frozen, mulch heavily with horse manure. This serves the double purpose of supplying the necessary plant ground, and retarding the growth of the buds until danger from frost is

Mrs. O. F. McHargue, 147 W. 9th St., Jacksonville, Florida, writes: had catarrh and throat trouble. Three bottles of Peruna cured me. As a minister's wife I come in contact with all classes of people, and shall always speak a good word for Peruna. I have given trial bottles to a few friends. Wishing you abundant success. I remain, yours truly."

Physicians Recommend Castoria

ASTORIA has met with pronounced favor on the part of physicians, pharmaceutical societies and medical authorities. It is used by physicians with results most gratifying. The extended use of Castoria is unquestionably tho result of three facts: First-The indisputable evidence that it is harmless: Second-That it not only allays stomach pains and quiets the nerves, but assimilates the food: Third—It is an agreeable and perfect substitute for Castor Oil. It is absolutely safe. It does not contain any Opium, Morphine, or other narcotic and does not stupefy. It is unlike Soothing Syrups, Bateman's Drops, Godfrey's Cordial, etc. This is a good deal for a Medical Journal to say. Our duty, however, is to expose danger and record the means of advancing health. The day for poisoning innocent children through greed or ignorance ought to end. To our knowledge, Castoria is a remedy which produces composure and health, by regulating the system-not by stupefying it-and our readers are entitled to the information.-Hall's Journal of Health.

Letters from Prominent Physicians addressed to Chas. H. Fletcher.

Dr. B. Halstead Scott, of Chicago, Ills., says: "I have prescribed your Castoria often for infants during my practice, and find it very satisfactory." Dr. William Belmont, of Cleveland, Ohio, says: "Your Castoria stands first in its class. In my thirty years of practice I can say I never have found anything that so filled the place."

Dr. J. H. Taft, of Brooklyn, N. Y., says: "I have used your Castoria and found it an excellent remedy in my household and private practice for many years. The formula is excellent."

Dr. R. J. Hamlen, of Detroit, Mich., says: "I prescribe your Castoria extensively, as I have never found anything to equal it for children's troubles. I am aware that there are imitations in the field, but I always see that my patients get Fletcher's."

Dr. Wm. J McCrann, of Omaha, Neb., says: "As the father of thirteen children I certainly know something about your great medicine, and aside from my own family experience I have in my years of practice found Castoria a popular and efficient remedy in almost every home."

Dr. J. R. Clausen, of Philadelphia, Pa., says: "The name that your Castoria has made for itself in the tens of thousands of homes blessed by the presence of children, scarcely needs to be supplemented by the endorsement of the medical profession, but I, for one, most heartily endorse it and believe it an excellent remedy.

Dr. R. M. Ward, of Kansas City, Mo., says: "Physicians generally do not prescribe proprietary preparations, but in the case of Castoria my experience, like that of many other physicians, has taught me to make an exception. I prescribe your Castoria in my practice because I have found it to be a thoroughly reliable remedy for children's complaints. Any physician who has raised a family, as I have, will join me in heartlest recom-

Inventor of the Airbrake.

Exact Copy of Wrapper.

Who really invented the airbrake? Certainly the automatic airbrake, the one that has proved practicable and of permanent value in modern railroading, was the product of the late George Westinghouse's ingenuity. His patent for the automatic brake was taken out in 1872, superseding the non-automatic or "straight" Westinghouse airbrake patented in 1869, and later the Westinghouse vacuum brake was invented. But, as in the case of most other inventions, there are several claimants for originality in this field. Thus, Mme. M. Drouanet, daughter of M. Debruges of Paris, claims the distinction of priority for her father. The New York Times has a letter from State Senator William P. Fiero of White Plains containing a patent office declaration by his grandfather, Henry Miller, of a "new and useful improvement in the application of steam and compressed air to the purpose of operating railroad brakes," recorded January 2, 1855. Mr. Miller was doubtless a pioneer in the progress of airbrake invention.

Its Tendency.
